

The UEE Cable Reel Stand incorporates a jack-type design that makes cable reel elevation fast and easy. The stands are made of heavy-wall tubing and consist of hydraulic jacks which allow for effortless operation and elevation of heavy cable reels.

operation and elevation of heavy cable reels.

Each stand's hydraulic jack is vertically adjustable to accommodate reels up to 80 inches in diameter.

The stands are equipped with hardwearing, iron-cast

wheels which allow for easy maneuvering of the stands, thus making set-up and removal of cable reels straight forward.

The stands are painted with a powder coating method which provides a durable and long-lasting finish. Safety orange is standard, but custom colors can be provided upon customer's request.

Lifting Detail
